Date: 6-18-2024

RE: Water District Upgrades and Projects for System Improvements

To all Rural Water District No. 8, McClain County Members,

We constantly strive to provide the best service and best water quality to all our members. These efforts, as well as system maintenance, require funds to accomplish. These burdens must be borne by the member, unless another source of funds is found.

We have been working with the Office of Environmental Health and Engineering (OEH&E) thru the Chickasaw Nation to try and obtain another source of funds for these projects. These funds are provided through the Indian Health Service. In order to utilize this source of funding, we need to provide some information to the Chickasaw Nation OEH&E, namely the physical address of Native Americans who are members of our system.

If you or any members of your household are of Native American descent, please write your 911 or physical address on this request and return it to the office at your earliest convenience. We do not need your name or any form of documentation, such as a CDIB card, nor do we need any documentation of tribal affiliation. You do not have to hold any tribal documentation to answer this request, simply whether you or a household member(s) are of Native American descent and your physical or 911 address.

Thank you very much for your cooperation! This will lower expenditures made by the District, and, thereby, keep your cost lower. Any questions please call the office Monday thru Friday 8am-4pm at {405-449-7700}.

Please respond no later than 7-31-2024. All the responses we get back and turned in will help us with getting the necessary grants and funding to better the system for you.

Thanks

Rural Water District No.8,
McClain County
